***A Case Approach to Medical-psychiatric Practice* Dec 29 2019 "A Case Approach to Medical-Psychiatric Practice" represents an unapologetic attempt to reinstate consultation-liaison psychiatry as a medical discipline. Intended as a teaching instrument rather than a comprehensive textbook, this volume presents case discussions that accurately capture the problem-oriented bedside world of medical-psychiatric practice. Psychiatrists at all stages of experience-from the resident to the seasoned practitioner-will find this book to be an invaluable guide to the complex clinical dilemmas encountered in hospital settings. The focus is on the differential diagnosis and pharmacological management of patients with medical conditions-for example, cardiovascular disease, pulmonary disease, cancer, delirium, gastrointestinal conditions, alcoholism with cirrhosis, kidney disease, HIV infection-who develop concurrent psychiatric problems. A consultation-liaison guide to DSM-IV is included, and guidelines for identifying and managing these disorders and their symptoms are provided. There are chapters on managing steroid-induced psychiatric syndromes, treating gynecological patients including breast cancer patients, and working with psychiatric illness during pregnancy. Each chapter contains case presentations followed by multiple-choice questions designed to challenge the reader's knowledge and ingenuity in responding to real-life clinical quandaries. The comprehensive literature reviews and discussion provided for each topic can be used by readers to expand their knowledge in areas of interest. Numerous appendixes serve as concise pull-out summaries for handy bedside reference. Reviews are clearly organized and extensively cross-referenced, making this book not only an exceptional**

**From A Question 2 An Answer Jan 02 2023** This book will be an interest to anyone who experienced the loss of a parent at a young age and who went out on their own. It will also be an interest to anyone who has served or worked in the armed forces, the electrical power industry, training and development or international consulting services. **From A Question 2 An Answer** begins with the author asking why his mother died at such a young age, and ends with the realization that, throughout his life she was always there. This is an autobiography framed by the premature death of his mother, but it also reveals other premature deaths in the authors life: his infant twins and his adult son. Considering the authors somewhat rough start into adulthood, he feels that he has achieved and experienced great things and much success; all be it, and mostly by the skin of his teeth. That skin provided by his mom and of course his dad, seemed to be brushed by them every day of his life.
