America's foremost baby and childcare experts, William Sears M.D. and Martha Sears, R.N., explain the benefits -- for both you and your child -- of connecting with your baby early. Would you and your baby both sleep better if you shared a bed? How old is too old for breastfeeding? What is a father's role in nurturing a newborn? How does early attachment foster a child's eventual independence? Dr. Bill and Martha Sears -- the doctor-and-nurse, husband-and-wife team who coined the term "attachment parenting" -- answer these and many more questions in this practical, inspiring guide. Attachment parenting is a style of parenting that encourages a strong early attachment, and advocates parental responsiveness to babies' dependency needs. The Attachment Parenting Book clearly explains the six "Baby B's" that form the basis of this popular parenting style: Bonding, Breastfeeding, Babywearing, Bedding close to baby, Belief in the language value of baby's cry, and Beware of baby trainers. Here's all the information you need to achieve your most important goals as a new parent: to know your child, to help your child feel right, and to enjoy parenting. In this thoughtful, comprehensive guide you will find ideas for encouraging spiritual growth in young people by one of the most authoritative voices in youth ministry today. Current knowledge about the nature of environmental influences upon children's development is synthesized in this volume. Wachs explores such issues as individual differences in response to stress, medical treatment, parenting styles and teaching approaches, and examines such questions as whether there are certain periods in children's development when they may be more sensitive to specific environmental influences than at other times, and whether girls are more sensitive than boys to parental maltreatment. *Tenacity in Children* examines how multiple generations of parents and caregivers raised children to become successful adults. Until relatively recent times in human history, there were no schools or organized institutions, nor were there parenting books. Rather, caregivers depended on the seven important instincts that evolved across tens of thousands of years in the human species. This volume highlights the ways in which these instincts are more important than ever in preparing children for tomorrow's successes. Key areas of coverage include individual chapters devoted to examining each of the seven instincts -- intuitive optimism, intrinsic motivation, compassionate empathy, simultaneous intelligence, genuine altruism, virtuous responsibility, and measured fairness -- as well as practical strategies to guide children in acquiring and fine-tuning these essential human instincts. *Tenacity in Children* provides a solid foundation to prepare children for a resilient and happy future. It offers well-defined guideposts for adults committed to providing every child with the opportunity to access, strengthen, and employ these instincts as they negotiate childhood and passage into adult life. This book also serves as a rich resource for researchers, practitioners, and graduate students in mental health and public health disciplines as well as many interrelated fields as we all strive to promote the well-being of children. The collaboration of these two esteemed psychologists has been impacting on our field for decades. This new book continues that tradition. -- Richard D. Lavoie, M.A., M.Ed. Author of *It's So Much Work to Be Your Friend: Helping Children with Learning Disabilities Find Social Success* *Tenacity in Children* is the perfect balance between concepts, knowledge, scientific discourse, practical ideas and touching stories that truly illustrate the principles shared in the book. This book should reach the hands of every person dedicated to working with children. -- Encarni Gallardo, MBA, CBM Executive Director, Children's Service Society of Utah Written in an easy-to-read, narrative style, Drs. Goldstein and Brooks impart their innovative concept of *Tenacity in Children* along with its seven essential instincts by using heartwarming stories, personal and professional insights, research, and wisdom. -- Joyce C. Mills, Ph.D. Co-author of *Therapeutic Metaphors for Children and the Child Within* Visit our website at www.tenacityinchildren.com "What a gift to new and expecting moms. Nurture is a thoughtful and helpful gift for expecting mothers and their partners. Erica Chidi is co-founder and CEO of Loom in Los Angeles, CA. She began her work in San Francisco, volunteering as a doula within the prison system, working with pregnant inmates. She went on to build a successful doula and health education practice in Los Angeles and has been featured in Women's Health, Vogue, Goop, The Cut and Marie Claire. "Wimberly's latest work presents pastors, church lay leaders and scholars with a new lens to think critically and joyously about how Christian education undergirds and supports the worship experience in nurturing faith and hope in black parishioners." --David L. Wallace, Sr., Dean, Johnson C. Smith Theological Seminary The Interdenominational Theological Center, Atlanta, Georgia "This highly recommended work provides a thoughtful yet comprehensive framework of the black Christian worshipping community as the context where faith and hope are nurtured." --Marsha Snulligan Haney, Associate Professor of Missiology and Religions of the World, The Interdenominational Theological Center, Atlanta, Georgia "This is a must read for all pastors and worship designers who desire to make worship relevant for African American Congregations." --Cecelia M. Long, former General Secretariat of the General Commission on the Status and Role of Women in the United Methodist Church "Innovative, dynamic, thought provoking, and inspiring. A must read for pastors, church leaders, Christian educators, and anyone interested in revitalizing Christian education in the 21st Century." --Yolanda Y. Smith, Assistant Professor of Christian Education, Yale University Divinity School, and author of Reclaiming the Spirituals: New Possibilities for African American Christian Education "Dr. Wimberly has seized upon the, heretofore, unspoken wisdom of the black church . . . Local church laity and clergy will easily access this fine work for local churches." --Lynne Westfield, Assistant Professor of Christian Education, Drew Theological School, Madison, New Jersey "Wimberly understands comprehensively the ways education is embodied in congregational life. Indeed, she invites us to nurture faith and hope." --Jack L. Seymour, Professor of Religious Education and Academic Dean, Garrett-Evangelical Theological Seminary, Evanston, Illinois Anne E. Streaty Wimberly is Professor of Christian Education at The Interdenominational Theological Center in Atlanta, Georgia. She is the author of several books including Soul Stories: African American Christian Education (1994). Do your connections with friends, family, or romantic partners leave you feeling empty, dissatisfied, or out of sync? What you may be missing is the close bond that's only experienced with people who make us feel secure and valued—the experience of feeling loved. Feeling Loved reframes the way we view love and connection and provides a new roadmap for getting the love we need. The book begins with a description of what we unwittingly do that hijacks our ability to feel loved and goes on to offer powerful researched-based tools to transform your relationships. A clinical psychologist of more than thirty years and cofounder of Helpguide.org, author Jeanne Segal, PhD, is a pioneer in the psychology of connection. Her engaging and practical approach guides readers in developing new ways of thinking, feeling, and acting in order to make life-altering social and emotional changes. In Feeling Loved, you will learn how to: - Grasp the difference between being loved and feeling loved - Identify the challenges that keep you from experiencing love and making others feel loved - Use proven techniques to reduce stress and regulate out-of-control emotions - Develop new ways of thinking, feeling, and acting to create emotional connections - Transform your relationships with everyone in your life, from family and friends to coworkers Segal makes new inroads into the science of relationships and explores the transformative power of nonverbal, face-to-face exchanges. Filled with inspirational, real-life stories, Feeling Loved provides a blueprint for getting the love and happiness we need. More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the next generation. Child and Adolescent Health and Development explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence. Breastfeeding and child feeding at the center of nurturing practices, yet the work of nurture has escaped the scrutiny of medical and social scientists. Anthropology offers a powerful biocultural approach that examines how custom and culture interact to support nurturing practices. Our framework shows how the unique constitutions of mothers and infants regulate each other. The Dance of Nurture integrates ethnography, biology and the political economy of infant feeding into a holistic framework guided by the metaphor of dance. It includes a critique of efforts to improve infant feeding practices globally by UN agencies and advocacy groups concerned with solving global nutrition and health problems. The perfect gift for every parent, this book explores the amazing effect of love on the developing brains of babies and toddlers Shaped by Love celebrates the interactions between babies and toddlers and the most significant people in their young lives—their parents and caregivers. It details developmental phases from infancy through toddlerhood and offers information and beautiful images that encourage healthy and nurturing childcare. Children's minds are molded by experience, and science tells us that the way a parent touches, holds, looks at, and responds to babies and toddlers has a lifelong impact on the way that this brand-new person will come to see the world and their place within it. Filled with irresistible images of babies and toddlers and first-person quotes, Shaped by Love is appealing to flip through. It is also a captivating read with well-researched child-rearing advice and information included in each chapter. The extraordinary memoir of a mother's love, commitment and nurturing, which allowed her son, originally diagnosed with severe autism, to flourish into a universally recognized genius--and how any parent can help their child find their spark. Today, at 13, Jacob is a paid researcher in quantum physics, working on extending Einstein's theory of relativity. Diagnosed at age 1 with severe autism, at 3 he was assigned to life-skills classes and his parents were told to adjust their expectations. The goal: tying his own shoes at 16. Kristine Barnett's belief in the power of hope and the dazzling possibilities that can occur when we keep our minds open and learn to fuel a child's true potential changed everything. The authors present evidence of the success of nurture groups, and examine what factors affect the success of the group. From this they draw key messages for effective practice, including the importance of recognising a child's emotional needs and meeting them, and the role of the relationship between the teaching staff co-ordinating the group. On December 14, 2012, Scarlett Lewis experienced something that no parent should ever have to endure: she lost her son Jesse in an act of unimaginable violence. The day started just like any other, but when a gunman opened fire at Sandy Hook Elementary School, Scarlett's life changed forever. However, this isn't a story about a massacre. It's a story about love and survival. It's about how to face the impossible, how to find courage when you think you have none, and how to choose love instead of anger, fear, or hatred. Following Jesse's

death, Scarlett went on an unexpected journey, inspired by a simple three-word message he had scrawled on their kitchen chalkboard shortly before he died: Nurturing Helin Love (Nurturing Healing Love). It was as if he knew just what his family would need in order to go on after this horrible tragedy. Bolstered by his words, Scarlett took her first step toward a new life. And with each step, it became clearer how true Jesse's message was. She learned that love was indeed the essential element necessary to move forward and that taking the path of love is a choice. We can live in anger and resentment, or we can choose love and forgiveness. With her decision made, she found some peace and began to believe that choosing love was the key to creating a healthy, safe, and happy world. She began the Jesse Lewis Choose Love Foundation to develop programs to teach children about the power each of us has to change our thoughts and choose a life without fear and hate. Nurturing Healing Love is Scarlett's story of how choosing love is changing her life—and how it could change our world. A portion of the proceeds from sales of this book will be donated to the Jesse Lewis Choose Love Foundation. I am not an author in the conventional sense, I am a messenger. If you want to find out what the greatest danger our American society faces Read this Book. As a society we are intensely concerned about "global warming", so much so that we have taken steps to curtail it. We have shut down coal mines, installed solar panels, inventing electric cars, and put restrictions the emissions that can be released into the air from industrial plants and cars. However; we are doing nothing about the 40,000 humans getting killed annually in the United States from gun violence alone. We do nothing about our public schools graduating boys and girls that can barely read or write, the atmosphere we live in daily is rife with omnifarious criminal endeavor: murder, robberies, car jacking, car window break ins, and other genre's of crime. In the essence we are losing the humaneness within our humanity. The activity that goes on in our American atmosphere I define as "human warnings." The conventional solutions we've tried year after year is to make new laws, build more prisons, and hire more police and judges to curb criminal endeavor. It has not worked, and never will because human decency, morals, principals, love, loyalty, and common sense cannot be legislated. Those things must be taught and emulated within society. Mental nurturing is the only solution. Read this book: "mental nurturing from 0 to 5 and beyond" and discover God's wisdom to fix the atmosphere in America. Examines the myriad ways contemporary residents of Beijing understand and nurture the good life, practice the embodied arts of everyday well-being, and in doing so draw on cultural resources ranging from ancient metaphysics to modern media. Adopted children who have suffered trauma and neglect have structural brain change, as well as specific developmental and emotional needs. They need particular care to build attachment and overcome trauma. This book provides professionals with the knowledge and advice they need to help adoptive families build positive relationships and help children heal. It explains how neglect, trauma and prenatal exposure to drugs or alcohol affect brain and emotional development, and explains how to recognise these effects and attachment issues in children. It also provides ways to help children settle into new families and home and school approaches that encourage children to flourish. The book also includes practical resources such as checklists, questionnaires, assessments and tools for professionals including social workers, child welfare workers and mental health workers. This book will be an invaluable resource for professionals working with adoptive families and will support them in nurturing positive family relationships and resilient, happy children. It is ideal as a child welfare text or reference book and will also be of interest to parents. Argues that children's development is influenced primarily by their peers--other children--rather than by their parents "The Eyres have created a beautiful new language of natural, nurturing symbols that allow parents and children to communicate in a new and effective way. A truly remarkable book which 'strikes at the root.'"--Steven Covey, author of The 7 Habits of Highly Effective Families "Nurturing is not just for parents. Aunts, uncles, grandparents, or anyone who loves a child needs to read this book."--Jane Clayson, ABC News correspondent "This book will motivate parents to reconnect as a family."--Library Journal A noted parenting expert provides the latest research on child development and offers games and activities parents can use to support their child's natural abilities. Drawing on the latest fascinating research in child brain development, noted parenting expert Jan Faull gives parents the essential tools to recognize and encourage their child's natural development- and have fun with their kids in the process. Simple to use and easy to understand, the techniques in Amazing Minds show parents how to support their children's capacity for learning. Faull describes chronologically what babies are capable of and the research behind those findings-then provides clear instruction, practical exercises, and fun games to play with babies to enhance their innate learning process. Amazing Minds will change how people view babies-from newborns to toddlers- and foster a new level of nurturing for generations of parents, educators, and caregivers. Faith left on rocky soil withers. But faith nurtured in the good soil of Christian teaching, formation, and mentorship grows to maturity and yields thriving community. Educational ministries are so often where this happens--where the desires of the human heart are shaped toward a love for God, a love for one's neighbor, and a love for the world. In this comprehensive guide to educational ministries in the twenty-first century, Fred Edie and Mark Lamport explore how church leaders and others involved in Christian education can nurture a robust, cruciform faith within their communities. When discussing strategies and goals, Edie and Lamport consider a range of contexts and a variety of related fields that might give insight into educational ministry: theology, pedagogy, philosophy, social science, and more. Those working with any age group--children, adolescents, and adults--will find a relevant discussion of key underlying theological themes, a guide to concrete practices, and indispensable help in navigating shifting cultural dynamics. Exceedingly practical and consistent with the teachings of the gospel, the wisdom in this book will speak to all who long to foster discipleship in their church, school, or missional community. Key Features A "Road Map" at the beginning of each chapter concisely introduces the chapter's topic and essential themes. Sidebars throughout the text provide deeper insight into particular important or nuanced concepts. Discussion questions at the end of each chapter facilitate further reflection, especially in conversation with others. Suggestions for further reading are provided at the end of each chapter for those interested in exploring the chapter's ideas in greater depth. Concluding the book is a series of afterwords from experts in the field of Christian educational ministries: Martyn Percy, Almeda Wright, Craig Dykstra, Kirsten Oh, Elizabeth DeGaynor, and Thomas Groome. Nurturing Soft Skills introduces the COACH framework to help parents nurture Confident, Outgoing, Articulate, Creative and Happier children, who feel empowered to try new things and believe they can always bounce back if success is not immediate. American fathers are a highly diverse group, but the breadwinning, live-in, biological dad prevails as the fatherhood ideal. Consequently, policymakers continue to emphasize marriage and residency over initiatives that might help foster healthy father-child relationships and creative co-parenting regardless of marital or residential status. In

Nurturing Dads, William Marsiglio and Kevin Roy explore the ways new initiatives can address the social, cultural, and economic challenges men face in contemporary families and foster more meaningful engagement between many different kinds of fathers and their children. What makes a good father? The firsthand accounts in Nurturing Dads show that the answer to this question varies widely and in ways that counter the mainstream "provide and reside" model of fatherhood. Marsiglio and Roy document the personal experiences of more than 300 men from a wide range of socioeconomic backgrounds and diverse settings, including fathers-to-be, young adult fathers, middle-class dads, stepfathers, men with multiple children in separate families, and fathers in correctional facilities. They find that most dads express the desire to have strong, close relationships with their children and to develop the nurturing skills to maintain these bonds. But they also find that disadvantaged fathers, including young dads and those in constrained financial and personal circumstances, confront myriad structural obstacles, such as poverty, inadequate education, and poor job opportunities. Nurturing Dads asserts that society should help fathers become more committed and attentive caregivers and that federal and state agencies, work sites, grassroots advocacy groups, and the media all have roles to play. Recent efforts to introduce state-initiated paternity leave should be coupled with social programs that encourage fathers to develop unconditional commitments to children, to co-parent with mothers, to establish partnerships with their children's other caregivers, and to develop parenting skills and resources before becoming fathers via activities like volunteering and mentoring kids. Ultimately, Marsiglio and Roy argue, such combined strategies would not only change the policy landscape to promote engaged fathering but also change the cultural landscape to view nurturance as a fundamental aspect of good fathering. Care is a human experience—not just a woman's responsibility—and this core idea behind Nurturing Dads holds important implications for how society supports its families and defines manhood. The book promotes the progressive notion that fathers should provide more than financial support and, in the process, bring about a better start in life for their children. A Volume in the American Sociological Association's Rose Series in Sociology In the tradition of authors such as David Sedaris and Ellen DeGeneres, these slice of life stories remind us that even though humans are deeply flawed, we're also pretty funny that way. Kelli Dunham demonstrates that comedy and chaos reign when you combine a great sense of humor with a determination to make bad ideas a fantastic reality. Whether she is hitchhiking across Haiti to help out with disaster relief or volunteering at a convention full of 7,000 screaming Sarah Palin fans, her humorous interpretation of difficult situations is both inspiring and entertaining. Tap into children's natural curiosity and scaffold their creative abilities across all domains of learning--and nurture your own creativity! Playing off the themes in the Caldecott Medal-winning children's book *Where the Wild Things Are*, this informative, practical, and encouraging guide will help parents guide boys down the path to healthy and authentic manhood. *Wild Things* addresses the physical, emotional, and spiritual parts of a boy, written by two therapists who are currently engaged in clinical work with boys and their parents and who are also fathers raising five sons. Contains chapters such as "Sit Still! Pay Attention!" "Deficits and Disappointments," and "Rituals, Ceremonies, and Rites of Passage." A fascinating look at the evolution of behavioral science, the revolutionary way it's changing the way we live, and how nurturing environments can increase people's well-being in virtually every aspect of our society, from early childhood education to corporate practices. If you want to know how you can help create a better world, read this book. What if there were a way to prevent criminal behavior, mental illness, drug abuse, poverty, and violence? Written by behavioral scientist Tony Biglan, and based on his ongoing research at the Oregon Research Institute, *The Nurture Effect* offers evidence-based interventions that can prevent many of the psychological and behavioral problems that plague our society. For decades, behavioral scientists have investigated the role our environment plays in shaping who we are, and their research shows that we now have the power within our own hands to reduce violence, improve cognitive development in our children, increase levels of education and income, and even prevent future criminal behaviors. By cultivating a positive environment in all aspects of society—from the home, to the classroom, and beyond—we can ensure that young people arrive at adulthood with the skills, interests, assets, and habits needed to live healthy, happy, and productive lives. *The Nurture Effect* details over forty years of research in the behavioral sciences, as well as the author's own research. Biglan illustrates how his findings lay the framework for a model of societal change that has the potential to reverberate through all environments within society. From Grammy Award-winning artist Michael W Smith and the co-creator of *VeggieTales* Mike Nawrocki comes *Let's Get Ready for Bed*, the second in a series of bedtime books in the *Nurturing Steps* line. This sweet and sleepy picture book will lull your little one to sleep with their favorite stuffed animal characters the *Nighty Nights*. As an added bonus, this book includes a link that allows readers to listen to Michael W. Smith singing the lullaby from the story. Founded by Michael W Smith, *Nurturing Steps*™ is an infant and toddler series of children's music and books with a simple mission to enliven a child's journey with hope and faith through music and storytelling. Designed to synthesize what we know about the nature of environmental influences (nurture) upon development, *Wachs* artfully explores whether development depends upon a sole factor - the rearing environment, genetics, nutrition, or individual characteristics - or, whether the degree of directional consistency combined with the extent of covariance among these factors may have the most developmental impact. Issues such as how individuals respond differently to stress, medical treatment, parenting styles, teaching approaches and daycare centers are all discussed through careful analysis of research and theories from a variety of fields. Analyzes the spiritual formation of young children and calls for renewed attention to scripture and the involvement of families in the process. This new edition of the bestselling text, *Nurturing Natures*, provides an indispensable synthesis of the latest scientific knowledge about children's emotional development. Integrating a wealth of both up-to-date and classical research from areas such as attachment theory, neuroscience developmental psychology and cross-cultural studies, it weaves these into an accessible enjoyable text which always keeps in mind children recognizable to academics, practitioners and parents. It unpacks the most significant influences on the developing child, including the family and social context. It looks at key developmental stages from life in the womb to the pre-school years and right up until adolescence, covering important topics such as genes and environment, trauma, neglect or resilience. It also examines how children develop language, play and memory and, new to this edition, moral and prosocial capacities. Issues of nature and nurture are addressed and the effects of different kinds of early experiences are unpicked, creating a coherent and balanced view of the developing child in context. *Nurturing Natures* is written by an experienced child therapist who has used a wide array of research from different disciplines to create a highly readable and scientifically trustworthy text. This book should be essential reading for childcare students, for teachers, social workers, health visitors, early years practitioners and those training or working in child counselling, psychiatry and mental health. Full of fascinating findings, it provides answers to many of the

questions people really want to ask about the human journey from conception into adulthood. . Kristine Barnett’s son Jacob has an IQ higher than Einstein’s, a photographic memory, and he taught himself calculus in two weeks. At nine he started working on an original theory in astrophysics that experts believe may someday put him in line for a Nobel Prize, and at age twelve he became a paid researcher in quantum physics. But the story of Kristine’s journey with Jake is all the more remarkable because his extraordinary mind was almost lost to autism. At age two, when Jake was diagnosed, Kristine was told he might never be able to tie his own shoes. *The Spark* is a remarkable memoir of mother and son. Surrounded by “experts” at home and in special ed who tried to focus on Jake’s most basic skills and curtail his distracting interests—moving shadows on the wall, stars, plaid patterns on sofa fabric—Jake made no progress, withdrew more and more into his own world, and eventually stopped talking completely. Kristine knew in her heart that she had to make a change. Against the advice of her husband, Michael, and the developmental specialists, Kristine followed her instincts, pulled Jake out of special ed, and began preparing him for mainstream kindergarten on her own. Relying on the insights she developed at the daycare center she runs out of the garage in her home, Kristine resolved to follow Jacob’s “spark”—his passionate interests. Why concentrate on what he couldn’t do? Why not focus on what he could? This basic philosophy, along with her belief in the power of ordinary childhood experiences (softball, picnics, s’mores around the campfire) and the importance of play, helped Kristine overcome huge odds. The Barnetts were not wealthy people, and in addition to financial hardship, Kristine herself faced serious health issues. But through hard work and determination on behalf of Jake and his two younger brothers, as well as an undying faith in their community, friends, and family, Kristine and Michael prevailed. The results were beyond anything anyone could have imagined. Dramatic, inspiring, and transformative, *The Spark* is about the power of love and courage in the face of overwhelming obstacles, and the dazzling possibilities that can occur when we learn how to tap the true potential that lies within every child, and in all of us. Praise for *The Spark* “[An] amazing memoir . . . compulsive reading.”—The Washington Post “*The Spark* is about the transformative power of unconditional love. If you have a child who’s ‘different’—and who doesn’t?—you won’t be able to put it down.”—Sylvia Nasar, author of *A Beautiful Mind* “Love, illness, faith, tragedy and triumph—it’s all here. . . . Jake Barnett’s story contains wisdom for every parent.”—Newsday “This eloquent memoir about an extraordinary boy and a resilient and remarkable mother will be of interest to every parent and/or educator hoping to nurture a child’s authentic ‘spark.’”—Publishers Weekly “Compelling . . . Jake is unusual, but so is his superhuman mom.”—Booklist “*The Spark* describes in glowing terms the profound intensity with which a mother can love her child.”—Andrew Solomon, author of *The Noonday Demon* and *Far from the Tree* “Every parent and teacher should read this fabulous book!”—Temple Grandin, author of *Thinking in Pictures* and co-author of *The Autistic Brain*
