Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms. The passage of Citizens United by the Supreme Court in 2010 sparked a renewed debate about campaign spending by large political action committees, or Super PACs. Its ruling said that it is okay for corporations and labor unions to spend as much as they want in advertising and other methods to convince

people to vote for or against a candidate. This book provides a wide range of opinions on the issue. Includes primary and secondary sources from a variety of perspectives; eyewitnesses, scientific journals, government officials, and many others. Of the Present Ability of America, with some Miscellaneous Reflections Use this practice book to bring all students up to a fifth grade reading level, bridging the gap between struggling and proficient readers. While teaching at an all-black middle school in Atlanta, Meira Levinson realized that students' individual self-improvement would not necessarily enable them to overcome their profound marginalization within American society. This is because of a civic empowerment gap that is as shameful and antidemocratic as the academic achievement gap targeted by No Child Left Behind. No Citizen Left Behind argues that students must be taught how to upend and reshape power

relationships directly, through political and civic action. Drawing on political theory, empirical research, and her own on-the-ground experience, Levinson shows how de facto segregated urban schools can and must be at the center of this struggle. Recovering the civic purposes of public schools will take more than tweaking the curriculum. Levinson calls on schools to remake civic education. Schools should teach collective action, openly discuss the racialized dimensions of citizenship, and provoke students by engaging their passions against contemporary injustices. Students must also have frequent opportunities to take civic and political action, including within the school itself. To build a truly egalitarian society, we must reject myths of civic sameness and empower all young people to raise their diverse voices. Levinson's account challenges not just educators but all who care about justice, diversity, or democracy. What are the philosophical and historical foundations of the

American political system? -- How did the framers create the Constitution? -- How has the Constitution been changed to further the ideals contained in the Declaration of Independence? -- How have the values and principles embodied in the Constitution shaped American institutions and practices? -- What rights does the Bill of Rights protect? -- What challenges might face American constitutional democracy in the twenty-first century? -- Reference. nation's foremost constitutional scholars team up to create an essential book on the United States Constitution for everyone grappling with today's most urgent political issues. Many of the political issues we struggle with today have their roots in one place—the U.S. Constitution. *Fault Lines in the Constitution* takes readers back to the creation of this historic document and reveals how many of the problems that trouble us today—such as voting rights, the Electoral College, gerrymandering—were first introduced. Each chapter begins with a story—all but one of them true—that connects directly back to a section of the document that forms the basis of our society and government.
