Unfortunately, we human beings do not come with a ready-made Owner's Manual to guide us through our individual life journeys. So, we are left with the task of finding or creating one of our own. This book is the result of the author's own personal search for just such a set of guidelines. He offers it to you, the reader, as a possible starting point for your own personal search. It is written in plain, every-day language and is broken down into bite-sized, easy to digest chapters. The book is divided into a number of segments. It begins with The Basics, which suggests an overall life goal of personal happiness and provides a review of the underlying principles of human development. Next comes three segments that help the reader to begin to find the answers to three important questions: "Who am I?" which uses a brief quiz game to identify the reader's personality type ; "What do I want?" which uses a short, fill-in-the-blanks worksheet to clarify values; and, "How can I get it?" which provides a detailed blueprint to aid personal development. **CRITICAL THINKING: A USER'S MANUAL** offers an innovative skill-based approach to critical thinking that provides step-by-step tools for examining arguments.

Users build a complete skill set by recognizing, analyzing, diagramming, and evaluating arguments. Later chapters encourage application of the basic skills to categorical, truth-functional, analogical and inductive, and causal arguments as well as fallacies. Exercises throughout the book engage readers in active learning, integrate writing as part of the critical thinking process, and emphasize skill transference.
