Ask the Coach Jan 28 2020 There are countless times throughout both our business and personal daily interactions when we feel weary or burdened by the continuous press of issues and challenges. It's at those moments of fatigue and weakness that all we need is a little encouragement--someone to listen or a fresh idea to cheer us on and strengthen us to finish our race. That is the role of a coach. As I reflect on the junctures of my own path, there's a consistent element that infused my ability to overcome, to press on to the mark, to endure the present hardship that ages our souls--that element is encouragement. I can remember on every seemingly hopeless occasion when I was poised to quit--the thought that I cannot bare another moment or live through another disappointment, at the very second of despair--I would receive a positive word of inspiration, just enough to fuel the possibility that I'm so close, and I am certainly too far to turn back now. My prayer is that you find hope for the journey you are on in the pages of this book.

The Postpartum Husband May 02 2020 For too many families, the postpartum period brings unexpected pain and devastation when depression entered the picture. The anticipated joy and pleasure of parenthood is replaced with feelings of fear, sadness, anger, confusion and resentment. Research has shown that supportive relationships during postpartum depression treatment is associated with a reduction in depressive symptoms. When partners have the right information, they will not only gain a better understanding of the illness and its impact, they will also feel better themselves. Furthermore, we know that this understanding and capacity for support is directly related to his wife's sense of well being and control. In my first book, "This Isn't What I Expected: Overcoming Postpartum Depression" (Bantam, 1994), we included a chapter for husbands, which turned out to be an invaluable resource for the partners of women suffering from PPD. After receiving feedback from the families I treat, I was shown that husbands needed support and information that is distinct from what their wives were seeking. "The Postpartum Husband" offers that information with its handy reference-style format and addresses specific questions that may arise throughout the course of the illness. As the husband feels more in control of the situation and his wife feels understood and cared for, symptoms improve and recovery is augmented.
