Revolutionary Power Sep 05 2020 In September 2017, Hurricane Maria hit Puerto Rico, completely upending the energy grid of the small island. The nearly year-long power outage that followed vividly shows how the new climate reality intersects with race and access to energy. The island is home to brown and black US citizens who lack the political power of those living in the continental US. As the world continues to warm and storms like Maria become more commonplace, it is critical that we rethink our current energy system to enable reliable, locally produced, and locally controlled energy without replicating the current structures of power and control. In *Revolutionary Power*, Shalanda Baker arms those made most vulnerable by our current energy system with the tools they need to remake the system in the service of their humanity. She argues that people of color, poor people, and indigenous people must engage in the creation of the new energy system in order to upend the unequal power dynamics of the current system. *Revolutionary Power* is a playbook for the energy transformation complete with a step-by-step analysis of the key energy policy areas that are ripe for intervention. Baker tells the stories of those who have been left behind in our current system and those who are working to be architects of a more just system. She draws from her experience as an energy-justice advocate, a lawyer, and a queer woman of color to inspire activists working to build our new energy system. Climate change will force us to rethink the way we generate and distribute energy and regulate the system. But how much are we willing to change the system? This unique moment in history provides an unprecedented opening for a deeper transformation of the energy system, and thus, an opportunity to transform society. *Revolutionary Power* shows us how.

The Power of One More Jan 28 2020 You're one more intentional thought and action away from discovering your best life In *The Power of One More*, renowned keynote speaker and performance expert Ed Mylett draws on 30 years of experience as an entrepreneur and coach to top athletes, entertainers, and business executives to reveal powerful strategies to help you live an extraordinary "one more" life. In *The Power of One More*, you'll: Learn why you're closer to

your dreams and goals than you think and why using The Power of One More strategies will help you cross the finish line in whatever race you're running Understand the psychology and science of how to use The Power of One More in every part of your life to help you solve problems and achieve levels of success you never thought possible Discover time-tested and unique solutions to challenges that will remove the mental roadblocks you've been battling for years Perfect for anyone who wants more bliss, wealth, or better relationships, The Power of One More is an indispensable roadmap to realizing and exceeding your personal and professional goals by tapping into the superpowers and gifts you already have inside you.

Pathologies of Power Feb 08 2021 "Pathologies of Power" uses harrowing stories of life and death to argue that the promotion of social and economic rights of the poor is the most important human rights struggle of our times.

No Shortcuts Nov 19 2021 "An examination of strategies for effective organizing"--

Natural Power Mar 24 2022

Money and Power Aug 24 2019 The bestselling author of the acclaimed *House of Cards* and *The Last Tycoons* turns his spotlight on to Goldman Sachs and the controversy behind its success. From the outside, Goldman Sachs is a perfect company. The Goldman PR machine loudly declares it to be smarter, more ethical, and more profitable than all of its competitors. Behind closed doors, however, the firm constantly straddles the line between conflict of interest and legitimate deal making, wields significant influence over all levels of government, and upholds a culture of power struggles and toxic paranoia. And its clever bet against the mortgage market in 2007—unknown to its clients—may have made the financial ruin of the Great Recession worse. *Money and Power* reveals the internal schemes that have guided the bank from its founding through its remarkable windfall during the 2008 financial crisis. Through extensive research and interviews with the inside players, including current CEO Lloyd Blankfein, William Cohan constructs a nuanced, timely portrait of Goldman Sachs, the company that was too big—and too ruthless—to fail.

Power May 02 2020 Impeccably researched and masterfully written, this book explains how and why humanity is driving itself off the cliff. — Dahr Jamail, author, *The End of Ice Weaving* together findings from a wide range of disciplines, *Power* traces how four key elements developed to give humans extraordinary power: tool making ability, language, social complexity, and the ability to harness energy sources — most significantly, fossil fuels. It asks whether we have, at this point, overpowered natural and social systems, and if we have, what we can do about it. Has *Homo sapiens* — one species among millions — become powerful enough to threaten a mass extinction and disrupt the Earth's climate? Why have we developed so many ways of oppressing one another? Can we change our relationship with power to avert ecological catastrophe, reduce social inequality, and stave off collapse? These questions — and their answers — will determine our fate.

New Power Jan 02 2023 From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. "Old power" is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. "New power" is made by many; it is open, participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and

#BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In *New Power*, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in—a world where connectivity has made change shocking and swift and a world in which everyone expects to participate.

The Purpose of Power Dec 09 2020 An essential guide to building transformative movements to address the challenges of our time, from one of the country's leading organizers and a co-creator of Black Lives Matter “Excellent and provocative . . . a gateway [to] urgent debates.”—Keeanga-Yamahatta Taylor, *The New Yorker* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Time • Marie Claire • Kirkus Reviews In 2013, Alicia Garza wrote what she called “a love letter to Black people” on Facebook, in the aftermath of the acquittal of the man who murdered seventeen-year-old Trayvon Martin. Garza wrote: Black people. I love you. I love us. Our lives matter. With the speed and networking capacities of social media, #BlackLivesMatter became the hashtag heard 'round the world. But Garza knew even then that hashtags don't start movements—people do. Long before #BlackLivesMatter became a rallying cry for this generation, Garza had spent the better part of two decades learning and unlearning some hard lessons about organizing. The lessons she offers are different from the “rules for radicals” that animated earlier generations of activists, and diverge from the charismatic, patriarchal model of the American civil rights movement. She reflects instead on how making room amongst the woke for those who are still awakening can inspire and activate more people to fight for the world we all deserve. This is the story of one woman's lessons through years of bringing people together to create change. Most of all, it is a new paradigm for change for a new generation of changemakers, from the mind and heart behind one of the most important movements of our time.

The Expulsive Power of a New Affection Sep 17 2021 Thomas Chalmers was a Scottish Presbyterian minister who served most of his life at St. John's parish in Glasgow—a congregation that was both the largest and the poorest congregation in the city. Known for his extensive charitable work in caring for the poor and downtrodden, Chalmers was also an astute theologian. One of his most notable works is *The Expulsive Power of a New Affection*, in which Chalmers inspires his readers to remove the tangles of sin through the expulsive power of a new affection—desiring God. As a result of the fall, human feelings of love are often misplaced on the creation rather than the Creator. This classic work of the faith reorients our affections toward him.

The Power of Music Nov 07 2020 The award-winning creator of the documentary *The Music Instinct* traces the efforts of visionary researchers and musicians to understand the biological foundations of music and its relationship to the brain and the physical world. 35,000 first printing.

New Parties in Government Feb 29 2020 This volume is a unique exploration of European political parties making the move towards government for the first time.

The New Power Eating Jun 26 2022 *The New Power Eating* delivers a science-based nutrition plan that explains what to eat and when and how to customize your diet for your physique, performance, and energy needs. This is the authoritative guide for adding muscle and cutting fat.

The New Power University Sep 25 2019 In a changing world, what is the social purpose of

higher education? Combining a critique of contemporary universities, a manifesto for the future and a provocation to stimulate change, *The New Power University* examines how higher education can flourish in the 21st century. Using the framing of 'new power', Jonathan Grant illustrates how a different purpose for universities is necessary, through the application of a new set of values that puts social responsibility at the core of the academic mission, allowing the university to become an advocate of the policy and political issues that matter to its communities. *The New Power University* offers both a warning against the complacency of old power and a voice for many who see the opportunity and necessity for radical change in higher education. 'Jonathan Grant examines the trends and urges the shedding of old shibboleths in order to embrace a new future. Insightful and engaging, this book will spur and shape the urgent debates learning communities need to have and resolve to avoid being left behind.' Julia Gillard, Former Australian Prime Minister and Minister for Education 'A must-read for anyone interested in the transformative power of higher education.' Ed Byrne, Former President King's College London; co-author of *The University Challenge* 'The New Power University is essential material for anyone wondering what universities are for and how they can help provide the answers to the most pressing challenges of our times.' Jo Johnson, Chairman of Tes Global; former UK Minister for Universities, Science and Innovation

A Question of Power Aug 17 2021 Historically, it was guns, germs, and steel that determined the fates of people and nations. Now, more than ever, it is electricity. Global demand for power is doubling every two decades, but electricity remains one of the most difficult forms of energy to supply and do so reliably. Today, some three billion people live in places where per-capita electricity use is less than what's used by an average American refrigerator. How we close the colossal gap between the electricity rich and the electricity poor will determine our success in addressing issues like women's rights, inequality, and climate change. In *A Question of Power*, veteran journalist Robert Bryce tells the human story of electricity, the world's most important form of energy. Through onsite reporting from India, Iceland, Lebanon, Puerto Rico, New York, and Colorado, he shows how our cities, our money--our very lives--depend on reliable flows of electricity. He highlights the factors needed for successful electrification and explains why so many people are still stuck in the dark. With vivid writing and incisive analysis, he powerfully debunks the notion that our energy needs can be met solely with renewables and demonstrates why--if we are serious about addressing climate change--nuclear energy must play a much bigger role. Electricity has fueled a new epoch in the history of civilization. *A Question of Power* explains how that happened and what it means for our future.

The New Democrats and the Return to Power Oct 19 2021 After Barack Obama's solid win in the 2012 election, it's easy to forget that there was a time, not long ago, when the Democrats were shut out of power for over a decade. But Al From remembers. In 1984, he led a small band of governors, US senators, and members of Congress to organize the Democratic Leadership Council (DLC). Their mission: to rescue the party from the political wilderness, redefine its message, and, most importantly, win presidential elections. In April 1989, From traveled to Little Rock, Arkansas, to recruit the state's young governor, Bill Clinton, to be chairman of the DLC. Here, Al From explores the founding philosophy of the New Democrats, which not only achieved stunning validation during Clinton's two terms, but also became the model for resurgent center-left parties in Europe and throughout the democratic world. Here, he outlines for the first time the principles at the heart of the movement, including economic centrism, national security, and entitlement reform, and why they are vital to the success of the Democratic Party in the years ahead.

New Power Sep 29 2022 NATIONAL BESTSELLER Shortlisted for the Financial

Times/McKinsey Business Book of the Year Award “The best window I’ve seen into this new world.” —David Brooks, *The New York Times* In this indispensable guide to navigating the twenty-first century, two visionary thinkers reveal how “new power” is reshaping politics, business, and life to be more open, participatory, and peer-driven. Here, Jeremy Heimans and Henry Timms reveal a new and compelling lens on the biggest stories of our age—from the out-of-nowhere victory of Donald Trump to the rise of mega-platforms like Facebook. They show the strength of new power—movements like #MeToo; platforms like Airbnb and Lyft; organizations like TED and Lego—as well as its dark side. They contrast it to “old power,” the foundations of which are coming under assault in an age of ubiquitous participation. The battle between old and new power is determining who governs us, how we work, and even how we think and feel. This groundbreaking book provides a new way to understand the world—and the tools we all need to thrive in it.

New Power May 26 2022 Two visionary thinkers examine the defining issue of our time: how the nature of power has changed, and how this 'New Power' is already shaping our future.

Truth Has a Power of Its Own Aug 05 2020 Never before published, an extraordinarily inspiring and radical conversation between Howard Zinn and PBS/NPR journalist Ray Suarez, wherein American history is turned upside down—published to coincide with the tenth anniversary of Zinn's death *Truth Has a Power of Its Own* is an engrossing collection of never-before-published conversations with Howard Zinn, conducted by the distinguished broadcast journalist Ray Suarez in 2007, that covers the course of American history from Columbus to the War on Terror from the perspective of ordinary people—including slaves, workers, immigrants, women, and Native Americans. Viewed through the lens of Zinn's own life as a soldier, historian, and activist and using his paradigm-shifting *People's History of the United States* as a point of departure, these conversations explore the American Revolution, the Civil War, the labor battles of the nineteenth and twentieth centuries, U.S. imperialism from the Indian Wars to the War on Terrorism, World Wars I and II, the Cold War, and the fight for equality and immigrant rights, all from an unapologetically radical standpoint. Longtime admirers and a new generation of readers alike will be fascinated to learn about Zinn's thought processes, rationale, motivations, and approach to his now-iconic historical work. Suarez's probing questions and Zinn's humane (and often humorous) voice—along with his keen moral vision—shine through every one of these lively and thought-provoking conversations, showing that Zinn's work is as relevant as ever.

Hard Power Jan 22 2022 Our ideas about national security have changed radically over the last five years. It has become a political tool, a "wedge issue," a symbol of pride and fear. It is also the one issue above all others that can make or break an election. And this is why the Democratic Party has been steadily losing power since 2001. In *Hard Power*, Michael O'Hanlon, an expert on foreign policy at the Brookings Institution, and Kurt Campbell, an authority on international security at the Center for Strategic and International Studies, explain how the Democrats lost credibility on issues of security and foreign policy, how they can get it back--and why they must. They recall the successful Democratic military legacy of past decades, as well as recent Democratic innovations--like the Homeland Security Office and the idea of nation-building--that have been successfully co-opted by the Republican administration. And, most importantly, they develop a broad national security vision for America, including specific defense policies and a strategy to win the war on terror.

The Age of Surveillance Capitalism Jun 02 2020 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our

behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

Exercise of Power Apr 24 2022 From the former secretary of defense and author of the acclaimed #1 bestselling memoir, *Duty*, a candid, sweeping examination of power, and how it has been exercised, for good and bad, by American presidents in the post-Cold War world. Since the end of the Cold War, the global perception of the United States has progressively morphed from dominant international leader to disorganized entity. Robert Gates argues that this transformation is the result of the failure of political leaders to understand the complexity of American power, its expansiveness and its limitations. He makes clear that the successful exercise of power is not limited to the ability to coerce or demand submission, but must also encompass diplomacy, strategic communications, development assistance, intelligence, technology, and ideology. With forthright judgments of the performance of past presidents and their senior-most advisers, insightful firsthand knowledge, and compelling insider stories, Gates's candid, sweeping examination of power in all its manifestations argues that U.S. national security in the future will require abiding by the lessons of the past, reimagining our approach, and revitalizing nonmilitary instruments of power essential to success and security.

The Power Dec 21 2021 What would happen if women suddenly possessed a fierce new power? "The Power is our era's *The Handmaid's Tale*." --Ron Charles, *Washington Post* **WINNER OF THE BAILEYS WOMEN'S PRIZE FOR FICTION** One of the *New York Times*'s Ten Best Books of the Year One of President Obama's favorite reads of the Year A *Los Angeles Times* Best Book of the Year One of the *Washington Post*'s Ten Best Books of the Year An NPR Best Book of the Year One of *Entertainment Weekly*'s Ten Best Books of the Year A *San Francisco Chronicle* Best Book of the Year A *Bustle* Best Book of the Year A *Paste Magazine* Best Novel of the Year A *New York Times* Book Review Editors' Choice An Amazon Best Book of the Year "Alderman's writing is beautiful, and her intelligence seems almost limitless. She also has a pitch-dark sense of humor that she wields perfectly." --Michael Schaub, NPR In *THE POWER*, the world is a recognizable place: there's a rich Nigerian boy who lounges around the family pool; a foster kid whose religious parents hide their true nature; an ambitious American politician; a tough London girl from a tricky family. But then a vital new force takes root and flourishes, causing their lives to converge with devastating effect. Teenage girls now have immense physical power--they can cause agonizing pain and even death. And, with this small twist of nature, the world drastically resets. From award-winning author Naomi Alderman, *THE POWER* is speculative fiction at its most ambitious and provocative, at once taking us on a

thrilling journey to an alternate reality, and exposing our own world in bold and surprising ways.

Unlimited Power Mar 31 2020 This self-help guide shows the reader step-by-step how to perform at their peak while gaining emotional and financial freedom, attaining leadership and self-confidence, and winning the confidence of others. It should enable the reader to gain the knowledge and courage to remake themselves.

Seeing the Light: The Case for Nuclear Power in the 21st Century Oct 26 2019 The first accessible book to discuss all aspects of nuclear power to help combat climate change and lethal air pollution.

New Power Dec 01 2022 NOW A NATIONAL BESTSELLER The definitive guide to spreading ideas, building movements, and leaping ahead in our chaotic, connected age. Get the book New York Times columnist David Brooks calls "the best window I've seen into this new world." Why do some leap ahead while others fall behind in our chaotic, connected age? In *New Power*, Jeremy Heimans and Henry Timms confront the biggest stories of our time--the rise of mega-platforms like Facebook and Uber; the out-of-nowhere victories of Obama and Trump; the unexpected emergence of movements like #MeToo--and reveal what's really behind them: the rise of "new power." For most of human history, the rules of power were clear: power was something to be seized and then jealously guarded. This "old power" was out of reach for the vast majority of people. But our ubiquitous connectivity makes possible a different kind of power. "New power" is made by many. It is open, participatory, and peer-driven. It works like a current, not a currency--and it is most forceful when it surges. The battle between old and new power is determining who governs us, how we work, and even how we think and feel. *New Power* shines fresh light on the cultural phenomena of our day, from #BlackLivesMatter to the Ice Bucket Challenge to Airbnb, uncovering the new power forces that made them huge. Drawing on examples from business, activism, and pop culture, as well as the study of organizations like Lego, NASA, Reddit, and TED, Heimans and Timms explain how to build new power and channel it successfully. They also explore the dark side of these forces: the way ISIS has co-opted new power to monstrous ends, and the rise of the alt-right's "intensity machine." In an era increasingly shaped by new power, this groundbreaking book offers us a new way to understand the world--and our role in it.

New Power Aug 29 2022

New Power Oct 31 2022 Shortlisted for the Financial Times and McKinsey Business Book of the Year Award 2018 "This book will inform and inspire all those wanting to make change . . . and achieve a goal against all odds." Jane Goodall, founder of the Jane Goodall Institute and a UN Messenger of Peace In this indispensable guide to navigating the 21st century, two visionary thinkers reveal the unexpected ways power is changing - and how 'new power' is reshaping politics, business and life. Why do some leap ahead while others fall behind in today's chaotic, connected age? In *New Power*, Australian Jeremy Heimans and Brit Henry Timms confront the biggest stories of our time - the rise of mega-platforms like Facebook and Uber; the out-of-nowhere victories of Presidents Barack Obama and Donald Trump; the unexpected emergence of movements like #BlackLivesMatter and #MeToo; and the eruption of darker forces such as ISIS. For most of human history, the rules of power were clear: power was something to be seized and jealously guarded. This 'old power' was inaccessible to the vast majority of people. But widespread connectivity has made possible a different kind of power. 'New power' is made by the many rather than the few. It is open, participatory, and peer-driven. It works like a current, not a currency - and like water or electricity, it is most forceful when it surges. In a world increasingly shaped by new power, this revelatory book gives each of us a new way to understand the world and our role in it. SHORTLISTED FOR THE FINANCIAL TIMES &

MCKINSEY BOOK OF THE YEAR 2018 PRAISE FOR NEW POWER " If you want to understand how the world is changing, what's really happening and how we can all find our way, this book could not be coming at a better time." Richard Branson "New Power is an essential and extremely insightful guide for anyone who wants to maximize the opportunities for progress and impact in today's new tightly connected world." Reid Hoffman, co-founder of LinkedIn and co-author of the #1 New York Times bestsellers *The Alliance* and *The Startup of You* "A must-read, *New Power* is a gift to our movements. It's not just about going viral-it's about connecting millions of people to roll up our sleeves and create the changes we long for." Alicia Garza, co-founder of Black Lives Matter

Landscapes of Power May 14 2021 In *Landscapes of Power* Dana E. Powell examines the rise and fall of the controversial Desert Rock Power Plant initiative in New Mexico to trace the political conflicts surrounding native sovereignty and contemporary energy development on Navajo (Diné) Nation land. Powell's historical and ethnographic account shows how the coal-fired power plant project's defeat provided the basis for redefining the legacies of colonialism, mineral extraction, and environmentalism. Examining the labor of activists, artists, politicians, elders, technicians, and others, Powell emphasizes the generative potential of Navajo resistance to articulate a vision of autonomy in the face of twenty-first-century colonial conditions. Ultimately, Powell situates local Navajo struggles over energy technology and infrastructure within broader sociocultural life, debates over global climate change, and tribal, federal, and global politics of extraction.

The Power of Habit Dec 29 2019 NEW YORK TIMES BESTSELLER • This instant classic explores how we can change our lives by changing our habits. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The Wall Street Journal* • *Financial Times* In *The Power of Habit*, award-winning business reporter Charles Duhigg takes us to the thrilling edge of scientific discoveries that explain why habits exist and how they can be changed. Distilling vast amounts of information into engrossing narratives that take us from the boardrooms of Procter & Gamble to the sidelines of the NFL to the front lines of the civil rights movement, Duhigg presents a whole new understanding of human nature and its potential. At its core, *The Power of Habit* contains an exhilarating argument: The key to exercising regularly, losing weight, being more productive, and achieving success is understanding how habits work. As Duhigg shows, by harnessing this new science, we can transform our businesses, our communities, and our lives. With a new Afterword by the author "Sharp, provocative, and useful."—Jim Collins "Few [books] become essential manuals for business and living. *The Power of Habit* is an exception. Charles Duhigg not only explains how habits are formed but how to kick bad ones and hang on to the good."—*Financial Times* "A flat-out great read."—David Allen, bestselling author of *Getting Things Done: The Art of Stress-Free Productivity* "You'll never look at yourself, your organization, or your world quite the same way."—Daniel H. Pink, bestselling author of *Drive* and *A Whole New Mind* "Entertaining . . . enjoyable . . . fascinating . . . a serious look at the science of habit formation and change."—*The New York Times Book Review*

Summary of New Power Jul 28 2022 *New Power: How Anyone Can Persuade, Mobilize, and Succeed in Our Chaotic, Connected Age*. Disclaimer: This book is not meant to replace the original book but to serve as a companion to it. ABOUT THE ORIGINAL BOOK: *New Power* (2018) maps out the changing world of technology and connectivity, how it's altering the nature of work itself - how it functions, how it's won and how it's held. *New Power* is a guide for anyone who's using technology to their advantage, whether it's new forms of work or new forms of life. ABOUT THE AUTHOR: James H. H. is an author, entrepreneur, political activist and CEO of

Purpose, a company that builds and supports movements for various businesses, and philanthropic engagement, and a cofounder of #GivingTuesday, a philanthropic movement.

The Power of Giving Away Power Jan 10 2021 “This book is a breakthrough. It’s beautifully written, perfectly timed and heralds a new way forward. I’m buying a dozen copies to share with friends and colleagues.” -Seth Godin, Founder of altMBA and author of *The Practice* If you let go of hierarchy, chaos will reign...or so many leaders believe. But when leaders find the courage to distribute rather than hoard power, creativity multiplies, trust deepens, and inclusivity expands... and a new kind of order emerges. A few rare leaders have learned to embrace a new organizational shape and mindset: Constellations. Organizations designed as constellations are dynamic and flexible networks of distinct yet interwoven individuals. Each member of the team feels like a singular star and is also connected to others to form something greater. That is how Visa reimaged how we pay for things, how Wikipedia beat the richest company in the world and how Barack Obama and his grassroots team revolutionized political campaigning. These leaders did what most leaders dread – they gave away power. Barzun brilliantly layers lessons across history and industries with his own experiences as an internet entrepreneur, political organizer, and US ambassador to the United Kingdom and Sweden. *The Power of Giving Away Power* shows how the Constellation mindset shines in some of the most impactful organizations and innovations the world has ever known. And it encourages us all to recognize, as Barzun writes, "the power we can create by seeing the power in others" — and making the leap to lead. Together.

Void of Power Jun 14 2021 The Void belongs to everyone and belongs to no one. Because of the Cultural War Treaty, the federal government or any agent under their control cannot enter the Void. Ruled for nearly sixty by gangs and drug cartels, the "settlers" of the Void must live by their wits and their skill at arms. Raised by scientists who had been sequestered in an underground complex in the Texas panhandle, the Walsh family employs their genius and talents to forever change the quality of life for the citizens of the Void using technologies far beyond the imagination of ordinary people. When government forces enter the Void on a capture-or-kill mission which has targeted two extraordinarily gifted children, they run headlong into this family of geniuses and Texas Rangers who dedicate themselves to protect the children. The feds soon realize that they are mice attempting to capture one very mean, intelligent cat.

The Power New Testament Jul 04 2020 The Power New Testament is a fresh translation of the Fourth Edition United Bible Society Greek Text, bringing out power in the Greek language that is frequently overlooked. It also translates Hebrew idioms that are commonly missed and explains Jewish customs. Expanded by 50 pages, The Power New Testament now features a 70 page glossary and over 1700 footnotes, double that of the previous edition!

The Power of Adrienne Rich Nov 27 2019 The first comprehensive biography of Adrienne Rich, feminist and queer icon and internationally revered National Book Award winning poet. Adrienne Rich was the female face of American poetry for decades. Her forceful, uncompromising writing has more than stood the test of time, and the life of the woman behind the words is equally impressive. Motivated by personal revelations, Rich transformed herself from a traditional, Radcliffe-educated lyric poet and married mother of three sons into a path-breaking lesbian-feminist author of prose as well as poetry. In doing so, she emerged as both architect and exemplar of the modern feminist movement, breaking ranks to denounce the male-dominated literary establishment and paving the way for the many queer women of letters to take their places in the cultural mainstream. Drawing on a wealth of unpublished materials, including Rich's correspondence and in-depth interviews with numerous people who knew her, Hilary

Holladay digs deep into never-before-accessed sources to portray Rich in full dimension and vivid, human detail.

Power at Ground Zero Mar 12 2021 The destruction of the World Trade Center complex on 9/11 set in motion a chain of events that fundamentally transformed both the United States and the wider world. War has raged in the Middle East for a decade and a half, and Americans have become accustomed to surveillance, enhanced security, and periodic terrorist attacks. But the symbolic locus of the post-9/11 world has always been "Ground Zero"--the sixteen acres in Manhattan's financial district where the twin towers collapsed. While idealism dominated in the initial rebuilding phase, interest-group trench warfare soon ensued. Myriad battles involving all of the interests with a stake in that space--real estate interests, victims' families, politicians, the Port Authority of New York and New Jersey, the federal government, community groups, architectural firms, and a panoply of ambitious entrepreneurs grasping for pieces of the pie--raged for over a decade, and nearly fifteen years later there are still loose ends that need resolution. In *Power at Ground Zero*, Lynne Sagalyn offers the definitive account of one of the greatest reconstruction projects in modern world history. Sagalyn is America's most eminent scholar of major urban reconstruction projects, and this is the culmination of over a decade of research. Both epic in scope and granular in detail, this is at base a classic New York story. Sagalyn has an extraordinary command over all of the actors and moving parts involved in the drama: the long parade of New York and New Jersey governors involved in the project, Mayor Michael Bloomberg, various Port Authority leaders, the ubiquitous real estate magnate Larry Silverstein, and architectural superstars like Santiago Calatrava and Daniel Libeskind. As she shows, political competition at the local, state, regional, and federal level along with vast sums of money drove every aspect of the planning process. But the reconstruction project was always about more than complex real estate deals and jockeying among local politicians. The symbolism of the reconstruction extended far beyond New York and was freighted with the twin tasks of symbolizing American resilience and projecting American power. As a result, every aspect was contested. As Sagalyn points out, while modern city building is often dismissed as cold-hearted and detached from meaning, the opposite was true at Ground Zero. Virtually every action was infused with symbolic significance and needed to be debated. The emotional dimension of 9/11 made this large-scale rebuilding effort unique; it supercharged the complexity of the rebuilding process with both sanctity and a truly unique politics. Covering all of this and more, *Power at Ground Zero* is sure to stand as the most important book ever written on the aftermath of arguably the most significant isolated event in the post-Cold War era.

The Heart of Power, With a New Preface Apr 12 2021 Even the most powerful men in the world are human—they get sick, take dubious drugs, drink too much, contemplate suicide, fret about ailing parents, and bury people they love. Young Richard Nixon watched two brothers die of tuberculosis, even while doctors monitored a suspicious shadow on his own lungs. John Kennedy received last rites four times as an adult, and Lyndon Johnson suffered a "belly buster" of a heart attack. David Blumenthal and James A. Morone explore how modern presidents have wrestled with their own mortality—and how they have taken this most human experience to heart as they faced the difficult politics of health care. Drawing on a trove of newly released White House tapes, on extensive interviews with White House staff, and on dramatic archival material that has only recently come to light, *The Heart of Power* explores the hidden ways in which presidents shape our destinies through their own experiences. Taking a close look at Franklin D. Roosevelt, Harry S. Truman, Dwight Eisenhower, John Kennedy, Lyndon B. Johnson, Richard Nixon, Jimmy Carter, Ronald Reagan, George Herbert Walker Bush, Bill Clinton, and George W. Bush, the book shows what history can teach us as we confront the health care challenges of

the twenty-first century.

Use the Power You Have Jul 16 2021 Washington's progressive champion explains how we can achieve a truly inclusive America that works for all of us In November 2016, Pramila Jayapal (D-WA) was elected to the U.S. House of Representatives, the first Indian American woman to serve in that role. Two years later, the "fast-rising Democratic star and determined critic of President Donald Trump," according to Politico's Playbook 2017 "Power List," won reelection with more votes than any other member of the House. Jayapal, co-chair of the Congressional Progressive Caucus, proved her progressive bonafides when she introduced the most comprehensive Medicare-for-all bill to Congress in February. Behind the story of Jayapal's rise to political prominence lie over two decades of devoted advocacy on behalf of immigrants and progressive causes—and years of learning how to turn activism into public policy that serves all Americans. *Use the Power You Have* is Jayapal's account of the path from sixteen-year-old Indian immigrant to grassroots activist, state senator, and now progressive powerhouse in Washington, DC. Written with passion and insight, *Use the Power You Have* offers a wealth of ideas and inspiration for a new generation of engaged citizens interested in fighting back and making change, whether in Washington or in their own communities.

Power to the Public Feb 20 2022 “Worth a read for anyone who cares about making change happen.”—Barack Obama A powerful new blueprint for how governments and nonprofits can harness the power of digital technology to help solve the most serious problems of the twenty-first century As the speed and complexity of the world increases, governments and nonprofit organizations need new ways to effectively tackle the critical challenges of our time—from pandemics and global warming to social media warfare. In *Power to the Public*, Tara Dawson McGuinness and Hana Schank describe a revolutionary new approach—public interest technology—that has the potential to transform the way governments and nonprofits around the world solve problems. Through inspiring stories about successful projects ranging from a texting service for teenagers in crisis to a streamlined foster care system, the authors show how public interest technology can make the delivery of services to the public more effective and efficient. At its heart, public interest technology means putting users at the center of the policymaking process, using data and metrics in a smart way, and running small experiments and pilot programs before scaling up. And while this approach may well involve the innovative use of digital technology, technology alone is no panacea—and some of the best solutions may even be decidedly low-tech. Clear-eyed yet profoundly optimistic, *Power to the Public* presents a powerful blueprint for how government and nonprofits can help solve society's most serious problems.

The Power Law Oct 07 2020 “A gripping fly-on-the-wall story of the rise of this unique and important industry based on extensive interviews with some of the most successful venture capitalists.” - Daniel Rasmussen, Wall Street Journal “A must-read for anyone seeking to understand modern-day Silicon Valley and even our economy writ large.” -Bethany McLean, The Washington Post “A rare and unsettling look inside a subculture of unparalleled influence.” —Jane Mayer “A classic...A book of exceptional reporting, analysis and storytelling.” —Charles Duhigg From the New York Times bestselling author of *More Money Than God* comes the astonishingly frank and intimate story of Silicon Valley's dominant venture-capital firms—and how their strategies and fates have shaped the path of innovation and the global economy Innovations rarely come from “experts.” Elon Musk was not an “electric car person” before he started Tesla. When it comes to improbable innovations, a legendary tech VC told Sebastian Mallaby, the future cannot be predicted, it can only be discovered. It is the nature of the venture-capital game that most attempts at discovery fail, but a very few succeed at such a scale that they

more than make up for everything else. That extreme ratio of success and failure is the power law that drives the VC business, all of Silicon Valley, the wider tech sector, and, by extension, the world. In *The Power Law*, Sebastian Mallaby has parlayed unprecedented access to the most celebrated venture capitalists of all time—the key figures at Sequoia, Kleiner Perkins, Accel, Benchmark, and Andreessen Horowitz, as well as Chinese partnerships such as Qiming and Capital Today—into a riveting blend of storytelling and analysis that unfurls the history of tech incubation, in the Valley and ultimately worldwide. We learn the unvarnished truth, often for the first time, about some of the most iconic triumphs and infamous disasters in Valley history, from the comedy of errors at the birth of Apple to the avalanche of venture money that fostered hubris at WeWork and Uber. VCs' relentless search for grand slams brews an obsession with the ideal of the lone entrepreneur-genius, and companies seen as potential "unicorns" are given intoxicating amounts of power, with sometimes disastrous results. On a more systemic level, the need to make outsized bets on unproven talent reinforces bias, with women and minorities still represented at woefully low levels. This does not just have social justice implications: as Mallaby relates, China's homegrown VC sector, having learned at the Valley's feet, is exploding and now has more women VC luminaries than America has ever had. Still, Silicon Valley VC remains the top incubator of business innovation anywhere—it is not where ideas come from so much as where they go to become the products and companies that create the future. By taking us so deeply into the VCs' game, *The Power Law* helps us think about our own future through their eyes.
