Knowledge of Microsoft 365 and a sound understanding of business acumen and sales through the delivery process is necessary to get the most out of this book. The fact that majority of IT investment projects fail is no longer new; time and time again the statistics of IT investment projects that are not delivered on time, within budget, and with the required functionality have remained the same with little or no improvement whatsoever. So far, the solutions to this problem have been proposed in silo (i.e., without much reference to each other) by academics and practitioners alike, which might explain why the number of failed IT investment projects doesn't seem to budge, even when numerous solutions have been suggested for overcoming this persistent challenge. In view of the apparent short coming of the suggested solutions for overcoming IT investment project failure, this book have prescribe five (5) integrated, mutually exclusive and collectively exhaustive rational steps that enterprises can follow to successfully invest in IT and subsequently generate maximum business value. These steps are orchestrated based on four-year extensive and intensive research into identifying the factors that are responsible for both the success and failure of IT investment projects, as well as, on more than a decade experience of the author in helping organizations around the world to successfully invest in both small and large-scale strategic IT-enabled business solutions. Moments of Impact is a book on a mission: to eradicate time-sucking, energy-depleting workshops and meetings. In our fast-changing world, organizations have important challenges and opportunities to address—and no time to waste. Moments of Impact delivers the single most useful resource for managers and leaders who need better strategic conversation—now—to shape the future of their organizations. Moments of Impact is an essential guide for ambitious leaders who get assigned the hardest and most vexing strategic issues in their organizations, for entrepreneurs trying to manage board expectations, for social change agents pioneering new business models for community impact, for hopeful educators and healthcare practitioners trying to transform slow-to-change industries, and for enterprising students committed to tackling global challenges. Drawing on decades of combined experience as innovation strategists, Ertel and Solomon articulate the purpose, principles, and practices of well-designed strategic conversations. They weave together a lively and compelling mix of social science theories and research, interviews with more than 100 thought leaders, organization leaders, and practitioners, as well as dozens of anecdotes and practical cases from diverse organizations. The book also includes a sixty-page Starter Kit with diagnostic questions, best practices, tips and suggestions, and recommended readings to enable you to put the ideas to work immediately. The threat of climate displacement looms large over a growing number of countries. Based on the more than six years of

work by Displacement Solutions in ten climate-affected countries, academic work on displacement and climate adaptation, and the country-level efforts of civil society groups in several frontline countries, this report explores the key contention that land will be at the core of any major strategy aimed at preventing and resolving climate displacement. This innovative and timely volume coordinated and edited by the Founder of Displacement Solutions, Scott Leckie, examines a range of legal, policy and practical issues relating to the role of land in actively addressing the displacement consequences of climate change. It reveals the inevitable truth that climate displacement is already underway and being tackled in countries such as Bangladesh, Kiribati, Papua New Guinea, Solomon Islands, Tuvalu and the United States, and proposes a series of possible land solution tools that can be employed to protect the rights of people and communities everywhere should they be forced to flee the places they call home. A practical guide for providing exceptional client service Most advertising and marketing people would claim great client service is an elusive, ephemeral pursuit, not easily characterized by a precise skill set or inventory of responsibilities; this book and its author argue otherwise, claiming there are definable, actionable methods to the role, and provide guidance designed to achieve more effective work. Written by one of the industry's most knowledgeable client services executives, the book begins with a definition, then follows a path from an initial new business win to beginning, building, losing, then regaining trust with clients. It is a powerful source of counsel for those new to the business, for industry veterans who want to refresh or validate what they know, and for anyone in the middle of the journey to get better at what they do. Freeing Your Radical Hero: Fighting the Impostor Mindset is a little book about a very big topic. It is filled with honesty, answers, and exercises. The book was inspired by Lou Solomon's TEDx Talk, "The Surprising Solution to the Impostor Syndrome." Her purpose, in an accessible, down-to-earth way, is to help others fight the impostor mindset; a journey that can be both humbling and exhilarating. "At last--a global plan that actually adds up."--James Hansen, former director, NASA Goddard Institute for Space Studies The world must reach negative greenhouse gas emissions by 2050 to avoid the most catastrophic effects of climate change. Yet no single plan has addressed the full scope of the problem--until now. In The 100% Solution, Solomon Goldstein-Rose--a leading millennial climate activist and a former Massachusetts state representative--makes clear what needs to happen to hit the 2050 target: the manufacturing booms we must spur, the moonshot projects we must fund, the amount of CO2 we'll have to sequester from the atmosphere, and much more. Most importantly, he shows us the more prosperous and equitable world we can build by uniting the efforts of activists, industries, governments, scientists, and voters to get the job done. This is the guide we've been waiting for. As calls for a WWII-scale mobilization intensify--especially among youth activists--this fully illustrated, action-oriented book arms us with specific demands, sets the stakes for what our leaders must achieve, and proves that with this level of comprehensive thinking we can still take back our future. A thought-provoking examination of artificial intelligence and how it reshapes human values, trust, and power around the world. Whether in medicine, money, or love, technologies powered by forms of artificial intelligence are playing an increasingly prominent role in our lives. As we cede more decisions to thinking machines, we face new questions about staying safe, keeping a job and having a say over the direction of our lives. The answers to those questions might depend on your race, gender, age, behavior, or nationality. New AI technologies can drive cars, treat damaged brains and nudge workers to be more productive, but they also can threaten, manipulate, and alienate us from others. They can pit nation against nation, but they also can help the global community tackle some of its greatest challenges—from food crises to global climate change. In clear and accessible prose, global trends and strategy adviser Olaf Groth, AI scientist and social entrepreneur Mark Nitzberg, along with seasoned economics reporter Dan Zehr, provide a unique human-focused, global view of humanity in a world of thinking machines.
