The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International. A classic Swedish novel about love, faith and spiritual renewal told in the form of a mystery novel. "Fitrah: Man's Natural Disposition" is a translation of the Persian book "Fi?rat" by the great Muslim thinker and reformer, Ayatollah Murtada Mutahhari. "Fitrah" is the theme of a 10-session lecture series given the martyred thinker in 1976-77. With ample citations from the Qur'an and other traditional Islamic sources, Mutahhari discusses the concept of 'fitrah' or man's natural disposition. The author does not confine himself to Islamic references as he continuously engages with the views of a wide range of philosophers including Plato, William James, Russell, Nietzsche, Marx, Feuerbach, Auguste Comte, Spencer, Will Durant, and Durkheim, among others. Mutahhari's ontological discussion covers a range of issues, including the literal and technical meaning of 'fitrah', sacred inclinations, love and worship, and the evolution of human originality. He also examines materialism and provides a theistic approach to some issues pertaining to the theories on the origin of religion, the evolution of

human society, intrinsic and acquired guidance, and intuitive and sensory dispositions. This book lays a significant interconnected and deep foundation in Islamic theology and an understanding of human psychology, sociology and anthropology fully supported by the holy Quran, ahadith, logic and philosophy. The reader will leave with a holistic understanding of Islam and a true connection with the Almighty (SWT) through one own self. This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant. This set contains 2 binders and nine books. The books are as follows: Outboard Motor Service Manual Volume 1, Outboard Motor Service Manual Volume 2, Old Outboard Motor Service Manual Volume 1, Old Outboard Motor Service Manual Volume 2, Inboard Outdrive Service Manual, Inboard Engine/Transmission and Drive Service Manual, Personal Water Vehicles Manuals, Outboard Flat Rate Manual, and Motor and Board Identification Reference Manual.
