The Wild Medicine Solution Jul 16 2021 Restoring the use of wild plants in daily life for vibrant physical, mental, and spiritual health • Explains how 3 classes of wild plants--aromatics, bitters, and tonics--are uniquely adapted to work with our physiology because we coevolved with them • Provides simple recipes to easily integrate these plants into meals as well as formulas for teas, spirits, and tinctures • Offers practical examples of plants in each of the 3 classes, from aromatic peppermint to bitter dandelion to tonic chocolate

As people moved into cities and suburbs and embraced modern medicine and industrialized food, they lost their connection to nature, in particular to the plants with which humanity coevolved. These plants are essential components of our physiologies--tangible reminders of cross-kingdom signaling--and key not only to vibrant physical health and prevention of illness but also to soothing and awakening the troubled spirit. Blending traditional herbal medicine with history, mythology, clinical practice, and recent findings in physiology and biochemistry, herbalist Guido Masé explores the three classes of plants necessary for the healthy functioning of our bodies and minds--aromatics, bitters, and tonics. He explains how bitter plants ignite digestion, balance blood sugar, buffer toxicity, and improve metabolism; how tonic plants normalize the functions of our cells and nourish the immune system; and how aromatic plants relax tense organs, nerves, and muscles and stimulate sluggish systems, whether physical, mental, emotional, or spiritual. He reveals how wild plants regulate our heart variability rate and adjust the way DNA is read by our cells, controlling the self-destructive tendencies that lead to chronic inflammation or cancer. Offering

examples of ancient and modern uses of wild plants in each of the 3 classes--from aromatic peppermint to bitter dandelion to tonic chocolate--Masé provides easy recipes to integrate them into meals as seasonings and as central ingredients in soups, stocks, salads, and grain dishes as well as including formulas for teas, spirits, and tinctures. Providing a framework for safe and effective use as well as new insights to enrich the practice of advanced herbalists, he shows how healing “wild plant deficiency syndrome”--that is, adding wild plants back into our diets--is vital not only to our health but also to our spiritual development.

Recreating Partnership Jan 02 2023 All couples go through challenging times: some survive and thrive, others don't. How can we understand and use this distinction in the practical application of therapy? In their solution-oriented, competency-based approach to couples therapy, Phillip Ziegler and Tobey Hiller answer this question. In *Recreating Partnership*, an innovative, theoretically sound, and practical handbook for clinicians, Ziegler and Hiller present a bold and clinically useful concept, the good story/bad story dichotomy. The book shows clinicians how to use this narrative concept in conducting effective and efficient relationship therapy that will help couples build solutions collaboratively, invigorate partnership, and thrive, each in their own unique ways. The book covers issues such as establishing rapport with antagonistic partners; developing therapeutic goals; hosting conversations that reinvigorate

the couple's good story; how, when, and whether to offer task assignments; addressing issues such as domestic violence; and how to bring therapy to a close, as well as many cogent and helpful transcripts. Written for psychologists, social workers, marriage and family therapists, and anyone who works with couples, Recreating Partnership will be exciting and useful to both the novice and experienced practitioner.

Business Innovation with New ICT in the Asia-Pacific: Case Studies Mar 31 2020 This book clarifies the direction of business innovation using new ICT such as the Internet of things (IoT), artificial intelligence (AI), smartphones, and cloud computing through a series of case studies on successful trials and advanced businesses in the Asia-Pacific where many industry sectors have been growing successfully in the 21st century. ICT has been playing an important role in value creation for customers and in profit generation for providers, contributing to various service innovation and business innovation. Now, digitalization using IoT and AI provides solutions to address various issues in the human society, which is transforming

services and businesses in the 21st century. “What is the direction of the business innovation using new ICT?” is a highly concerned question for business researchers and practitioners. Aiming to answer the question, this book conducts a number of cases studies in the Asia-Pacific region, including the Mainland China, Taiwan, Japan, Malaysia, Vietnam, as well as Australia. Among the studies, there are 4 cases from ICT providers, 4 cases from traditional and services, and 6 cases from new ICT applications and businesses. Each case analyzes social needs and human desires, new value created, roles of new technologies, processes and difficulties in developing new businesses, the relationship among customers, providers, and stakeholders, value chain co-creation and optimization, factors of success, and business models. Finally, the direction of business innovation with new ICT in the Asia-Pacific is suggested by summarizing the findings from the case studies through the lens of the theoretical analysis in service science.

ebXML Simplified Aug 24 2019 The first guide to understanding ebXML and its strategic implementation Just ratified in March 2001, ebXML is the new standard for B2B data exchange and the cornerstone of the next generation of B2B applications. IT managers are now scrambling to plan for the huge and complex job of upgrading their non-XML legacy systems. This book provides a concise, yet thorough introduction to ebXML and features guidelines for making strategic decisions concerning ebXML implementation. Following an overview of ebXML, the problems it solves, and how it relates to other standards, the author explains how major B2B vendors plan to integrate ebXML into their products. Eric Chiu then takes a detailed look at ebXML's technical architecture, with discussions of its design conventions and each of the major specifications that comprise ebXML. ebXML is the cornerstone technology for the next generation of B2B applications 80% of all B2B traffic by the year 2003 will use ebXML The book provides

business and IT managers with a quick introduction to the essentials of ebXML

Drawdown Feb 29 2020 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world

“At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming

“There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox

“This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA

In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach

drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Game Theory in Management Accounting Oct 19 2021 This book demonstrates what kind of problems, originating in a management accounting setting, may be solved with game theoretic models. Game theory has experienced growing interest and numerous applications in the field of management accounting. The main focus traditionally has been on the field of non-cooperative behaviour, but the area of cooperative game theory has developed rapidly and has received increasing attention. Intensive research, in combination with the changing culture of publishing, has produced a nearly unmanageable number of publications in the areas concerned. Therefore, one main purpose of this volume is providing an intensive analysis of the intersection of these areas. In addition, the book strengthens the relationship between the theory and the practical applications and it illustrates the two-sided relationship between game theory and management accounting: new game theoretic models offer new fields of applications and these applications raise new questions for the theory.

Clinical Handbook of Couple Therapy, Fifth Edition Oct 07 2020 Regarded as the authoritative reference and text, this handbook presents the most effective, widely studied approaches to couple therapy. The distinguished coeditors bring together other leading experts, most of whom developed the approaches they describe. Adhering closely to a uniform structure to facilitate study and comparison, chapters cover the history, theoretical and empirical underpinnings, and techniques of each model. The volume also describes cutting-edge applications for particular relationship contexts (such as blended families, LGBT couples, and separated

couples) and clinical problems (such as partner aggression, psychological disorders, and medical issues). **New to This Edition**
***Chapters on interpersonal neurobiology and intercultural relationships. *Chapters on couple therapy for PTSD, functional analytic couple therapy, and the integrative problem-centered metaframeworks approach. *Many new authors.*Extensively revised with the latest theory and research. See also Clinical Casebook of Couple Therapy, edited by Alan S. Gurman, which presents in-depth illustrations of treatment.**

Go To Market Strategy Aug 17 2021 In this path-breaking new book, best-selling author and leading go-to-market strategist Larry

Friedman provides a practical and battle-tested approach for taking products, services, divisions, or even an entire company to market! Drawing on dozens of examples and best-practices across a variety of industries, 'Go To Market Strategy' lays out a clear and actionable blueprint for building a winning go-to-market plan - one that will enable you to do more business, with more customers, more often, and more profitably. In this book you'll find all of the techniques and tools you need to answer today's crucial go-to-market questions: · Which markets offer the best opportunities for profitable growth? · What do my target customers need? How can I do a lot more business with them? · What mix of channels and partners will help me reach and sell to the most customers at the lowest possible cost? · Do I have the right product or solution? How can I create broader customer interest in my offerings? · Do I have a winning value proposition? What would make the 'message' more compelling - and drive more purchasing activity? 'Go To Market Strategy' is not about incremental change. As Friedman points out, it is for executives seeking nothing less than double-digit revenue growth and the slashing of at least 10-15 percent of selling costs - absolutely realistic results that go-to-market innovators have consistently achieved. This book lays out all of the techniques used by the world's top go-to-market leaders, so you too can achieve those kinds of results, and gain a real go-to-market competitive advantage in your markets.

Addressing Identity, Access and Compliance Requirements using IBM Tivoli Identity and Access Assurance Sep 25 2019 Today, security is a concern for everyone, from members of the board to the data center. Each day another data breach occurs. These incidents can affect an organization's brand, investment return, and customer base. Time spent managing security incidents and managing risks can take time away from focusing on strategic business objectives. Organizations need to address security challenges by administering, securing, and monitoring identities, roles, and entitlements with efficient life-cycle management, access controls, and compliance auditing. Those tasks include automated and policy-based user management to effectively manage user accounts and centralized authorization for web and other applications, and also enterprise, web, and federated single sign-on, inside, outside, and between organizations. Increasingly important requirements are the integration with stronger forms of authentication (smart cards, tokens, one-time passwords, and so forth) and centralizing policy-based access control of business-critical applications, files, and operating platforms. This IBM® Redpaper™ publication describes how the IBM Tivoli® Identity

and Access Assurance offering can help you address compliance initiatives, operational costs (automating manual administrative tasks that can reduce help desk cost), operational security posture (administering and enforcing user access to resources), and operational efficiencies (enhancing user productivity).

***Product Management* May 14 2021 Product management is a demanding but exciting career. The product managers challenges are unending, his responsibilities are rigorous, and what he does, has direct impact on a companys financial performance. Building and launching new products and turning an idea from a piece of paper into a functional product is almost a miracle. In addition, the product manager manages the product throughout its life. In doing so, the product manager deals with pretty much every function in the company. Speaking of the product life, anything done well during the planning phase will pay off during the other phases of the product life cycle. The execution phase is the phase when a product really takes shape. Once the product is complete and ready to be launched, it is an exciting time for the product manager. The product is ready to put under real-world test. Just building and launching a product is not enough. Target customers should be told about how great a**

product is, which takes good marketing and evangelism. Market routes must be established to sell and promote the product and make business out of it. Additionally, different types of services can be defined to be attached with the product as an overall offering. Defining and implementing a go-to-market plan for the product is a complicated but interesting set of activities. If the go-to-market ecosystem is set up well, the product manager can watch his products and associated services revenues multiply. Once the product is out there, it needs to be taken care of. Sustaining a product takes effort. This is the time to turn a good product into a great product to take the product toward completeness and maturity. Eventually, any product will get old and obsolete. Even the greatest of products must be given a farewell, and the end of life must happen to keep the innovation wheel rotating. New products and services enter the picture, and the product management action starts all over again.

The Economic Geography of the IT Industry in the Asia Pacific Region Aug 05 2020 The development of the information technology (IT) industry in the Asia Pacific region faces two challenges. Firstly, can its established physical, technical, regional and governance infrastructures be adapted to meet the challenges embedded in the set of products and processes created by the IT industry? Secondly, as this adaptation evolves, which cities and regions will be best suited to connect to or lead global responses to these challenges? The chapters in this book have set out to explore these questions, providing details of change in a range of aspects of the IT industry such as mobile phones, software services, and flat screen design in regions in Japan, Korea, Taiwan, India, China and Australia. The book also outlines the policy responses of national and regional governments in Singapore, India and China and India. These case studies provide a basis to understand effective strategies which could be formulated for the future. This book's originality emerges from the fine detail provided about firms, in particular regions and cities,

from research carried out by young scholars in the past two years. This makes it very useful for readers keen to understand the recent changes in this dynamic industry in a fast growth part of the world, and it will also help to shape thinking by policy makers on policy settings that can be applied.

Enabling Solutions for Sustainable Living Jun 02 2020 Sustainability, environmental impact, green design, urban sprawl -- all buzzwords we have become familiar with in the ongoing dialogue about climate change and global warming. This book presents student work that explores these issues and exemplifies the application of Ezio Manzini's theories of "enabling solutions". Students from the University of Calgary's Faculty of Environmental Design worked together to identify some of the challenges of suburbia with respect to sustainable design. Exploring such issues as the local quality of life, community cohesiveness, and environmental impacts of suburban areas, the workshop participants presented posters, tables, matrices, and other graphic materials that illustrate key concepts, the

resources required, and the main players involved in their implementation. In addition to the student work showcased here, "Enabling Solutions" also includes essays by Manzini, Walker, and Wylant that contextualise the key issues and elaborate on the theoretical basis for the student workshop.

Moving Beyond Betrayal Dec 01 2022 Partners experience dire consequences as a result of being in a relationship with someone suffering from compulsive sexual behavior. Their emotional well-being requires developing new skill sets for self-care and self-protection as they confront the difficult and painful process of discovery, disclosure, and beyond. In other words—they need boundaries. This is the first book specifically for partners affected by addictive behavior that addresses, in detail, how to identify, create, and maintain boundaries as a vital component of self-care and an indispensable tool for healing and growth. **Moving Beyond Betrayal** guides partners to define the current problem(s); identify needs that aren't being met; find where they have the power to effect change; take action; and evaluate the results to determine if their goal has been accomplished. The author examines all aspects of effective boundary work, including what to do when boundaries are violated. Through working the 5-Step Boundary Solution partners will: Gain clarity Reduce the chaos inherent in relationships impacted by sex addiction Feel more empowered and in control of their lives Discover whether or not their relationship with the addict is salvageable **Vicki Tidwell Palmer** is a Licensed Clinical Social Worker (LCSW), Certified Sex Addiction Therapist (CSAT), and Somatic Experiencing Practitioner (SEP) in private practice in Houston, Texas. She is the author of the blog for partners **Survival Strategies for Partners of Sex Addicts**.
